#### Diploma in Computer Networking

Completion

85%

The free online course Diploma in Computer Networking introduces the key devices found on local area networks (LANs), explains the structure and function of different types of LANs and WANs, and introduces you to the network architecture and protocols used in network security. The course begins by introducing you to the key devices found on LANs such as hubs, switches and routers, and how each of these devices functions to allow for effective and efficient communication on the LAN. You will then...
